

# Archived:Dialing any number that ends with an emergency number (112, 911) fails with KErrNotSupported

**Archived:** This article is [archived](#) because it is not considered relevant for third-party developers creating commercial solutions today. If you think this article is still relevant, let us know by adding the template `{{ReviewForRemovalFromArchive|user=~~~~|write your reason here}}`.

Dialling a number that ends with an emergency number (112, 911) using the ETel 3rd party API's DialNewCall fails with KErrNotSupported. This issue is not reproducible in India with local emergency numbers (100, 101, 108).

---

## How to reproduce

1. Install the IsvTelCallApp application available in the SDK.
2. Launch the application.
3. Type a number that ends with an emergency number, such as XXXXXXX112, and select Call.
4. The call fails with KErrNotSupported.

---

## Solution

No solution available. This problem is expected to be fixed in future firmware versions.
