## Archived: Uninstalling a Symbian Web Runtime app

**Archived:** This article is archived because it is not considered relevant for third-party developers creating commercial solutions today. If you think this article is still relevant, let us know by adding the template {{ReviewForRemovalFromArchive|user=~~~|write your reason here}}.

Note: This API is not part of the public SDK. It can be found in the SDK API Plug-in.

## Description

The SWInstallerLauncher API can be used to uninstall a widget by passing the appropriate MIME type "application/x-nokia-widget" and the UID of the widget.

The following sample code can be used to uninstall a widget.

```
_LIT8(KMIMEType, "application/x-nokia-widget");
SwiUI::RSWInstLauncher iLauncher;
User::LeaveIfError(iLauncher.Connect());
TRequestStatus status;
iLauncher.Uninstall(status, TUid::Uid(<uid of the widget>), KMIMEType);
User::WaitForRequest(status);
iLauncher.Close();
```

## Example application

This example application silently uninstalls a widget.
