Articles

H

- How to check if a specific API is supported in Java ME
- How to detect if a Class/Package is available on the phone
- How to get a random number from range
- How to send MIDlet to background on Symbian

H cont.

- How to swap variable values in Java ME using bitwise operations

J

- J2ME API Bridge Interface for accessing native Symbian apps/services
- Java ME API support on Nokia devices

L

- Launching Java apps at phone startup

N

- Normalize string whitespaces with J2ME

R

- Regex in Java ME

A

- A ApiBridge em Java ME

C

C cont.

- Como mandar um MIDlet para o segundo plano
- Como normalizar uma String com espaços em branco, usando Java ME
- Como obter um número aleatório em Java ME

C cont.

- Como trocar os valores das variáveis utilizando operações bit a bit.
- Cálculo de IMC em Java ME

(C) Copyright Nokia 2013. All rights reserved.

- Checando se uma API específica é suportada em Java ME
- Como detectar se uma classe/pacote está disponível no telefone

如

- 如何动态检查功能类或功能包的存在

诺

- 诺基亚支持的Java移动版API

S

- StringTokenizer pada Java ME

A

- Utilizando conteúdo Flash Lite dentro de aplicações Java ME

E

- Expressão regular em Java ME
