

# How to get the count of unread messages from Inbox

```
CMSvEntry* entry = CMSvEntry::NewL(*iMsvSession, KMsvGlobalInBoxIndexEntryId, TMsvSelectionOrdering());
CleanupStack::PushL(entry);
CMSvEntrySelection* entries = entry->ChildrenL();
CleanupStack::PushL(entries);
TInt nUnreadCount;
for(TInt i=0;i<entries->Count();i++)
{
    entry->SetEntryL(entries->At(i));
    TMsvEntry msvEntry(entry->Entry());
    if( msvEntry.Unread())
        nUnreadCount++;
}
CleanupStack::PopAndDestroy(2);
```
