Installation

This article explains how to make MADDE work on Windows 7 64 bit.

Please follow the step [Getting started with MADDE on Windows](#) by Croozeus but **in the driver installation step, please use this modified driver.** (Download here [File:Nokia770 USB Ethernet RNDIS with x64 support.zip](#))

How to install driver in Windows 7:

1. Go to **Device Manager** by **right mouse click at My Computer** and select **Properties** and then select **Device Manager** in the left pane
2. Right mouse click at new device with yellow triangle and select **Update Driver Software...**
3. Select **Browse my computer for driver software**
4. Select **Let me pick from a list of device drivers on my computer**
5. Now click **Have Disk** and then browse to driver file downloaded above
6. Click Next and then Finish!!

Test Result

After driver installation completed, there will be new network adapter named "Nokia 770 USB Ethernet/RNDIS" appear when you plug your N900 in. Don't surprise if it shows as unplugged since it's just a driver problem. However, if it shows, it means your N900 is plugged in and connected completely already. ;)

Known Issue

- Don't surprise if Network Adapter show as **unplugged**
- Don't forget to fix this new Network Adapter IP with IP in the same subnet as N900
- Ping is the only way to make sure your settings are correct
