

Template:Stub

Stubs are empty articles requested by wiki users, that we hope other developers will extend. Creating stubs seeded with basic information can encourage contribution and should point the way towards the future directions that the Wiki can grow.

This template is used to mark "Stub" topics and to provide basic information about what information is required by the article.

Usage

`{{Stub|timestamp={{subst:CURRENTTIMESTAMP}}}|Enter text here about what you would like to see in the article.}}`

Parameters

- `timestamp`: Timestamp for when stub created.
 - first un-named parameter is explanation of what content the stub should contain

Optional parameters:

- *language*: The language category of the natural language the template is to display in. If no language is specified or if the specified language is not supported then the English version is used.
 - Translations exist for: Lang-Portuguese, Lang-Chinese, Lang-Russian, Lang-Bahasa Indonesia
 - For example:

{{Stub|language=Lang-Chinese|timestamp={{subst:CURRENTTIMESTAMP}}|Text describing what is needed for article}}

存根:这篇文章是一个存根 ---一个被其他维基用户的请求的“空”的文章。您能帮助扩展这篇文章,或加些评论,来提供部分所需的信息。

Esboço: Este artigo é um esboço - um artigo contendo apenas uma estrutura geral, criado a pedidos de algum usuário do wiki. Você pode ajudar a completá-lo ao providenciar o conteúdo do artigo, ou fazendo comentários que ajudem na escrita dele.

*Sugestões para conteúdo:*Text describing what is needed for article

Заготовка: Данная статья является заготовкой, созданной по запросу одного из пользователей википедии.

Предложения по содержанию: Text describing what is needed for article

Kerangka: Ini adalah kerangka artikel - sebuah artikel "kosong" yang telah diajukan oleh pengguna wiki yang lain agar dibuat.

Anda dapat melengkapi artikel ini, atau dengan memberikan komentar yang berkaitan dengan artikel ini.

Saran untuk konten artikel: Text describing what is needed for article

Examples

Article	Suggestions
Application Distribution	<ul style="list-style-type: none">- Making asynchronous calls synchronous- Initializing a TRequestStatus variable with KRequestPending- Hard coding file paths in source code
Category:Bad Practice	
General mobile app design guidelines	
Getting started with qooxdoo JavaScript library	This article only includes a subset of reasonable design guidance. I suggest adding a number of sections and populating each section by area. Also providing links to platform specific design guidance.

SVG basics	<ul style="list-style-type: none">- What is the Platform Service framework?- Which platform releases support this framework?- Which runtimes can access platform services through this framework?- Which platform services can be accessed through this framework?
Sandbox/Hamishwillee/WikiTests/InformationBoxes	This page is waiting for active contributors.
Windows Phone User Interface Controls	The article has made a good start, but is missing many examples and screenshots. Feel free to extend this everyone.

Appearance

The default template (with no additional information) is shown below:

Stub: This article is a stub - an "empty" article that has been requested by another wiki user.

You can help by extending the article, or by adding comments which provide part of the information required.
