Category:HERE Maps for Java ME

This category contains articles about the HERE Maps API for Java ME. This API has been integrated as a plug-in into the Asha SDK 1.0, but still remains fully backwards compatible for older Series 40 phones. The API provides mapping, search and routing functionality and targets devices that support the Mobile Information Device Profile (MIDP) for Java Micro Edition, such as Nokia Series 40 devices. Ask questions about this API in the discussion board.
