Category:MeeGo Harmattan

This category contains community-created topics about developing for MeeGo Harmattan and the Nokia N9 device. As the main app development framework for MeeGo Harmattan is Qt, most topics in Category:Qt are also relevant to MeeGo Harmattan Development.

Note:

- MeeGo is an open source Linux-based embedded platform managed by the Linux Foundation which combines Intel's Moblin and Nokia's Maemo. Nokia has created one commercial device (Nokia N9) based on MeeGo Harmattan.
- This category includes the **Archived** Beta MeeGo Harmattan 1.2 Platform Guide. For the current platform guide see Meego 1.2 Harmattan Developer Documentation

We currently have 786 MeeGo articles in this Wiki.
