How to change the Java API access settings on Symbian phones

S60 phones up to 3rd Edition (inclusive)

To be able to see the available API access settings for a MIDlet and to change them, one has to navigate to Application Manager. This application can be usually found in the Settings folder.

After opening the Application Manager, scroll down to the MIDlet in question. Select **Options->Suite** settings to see and change the settings for each of the functional groups.

S60 3rd Edition Feature Pack 1 phones

To be able to see the available API access settings for a MIDlet and to change them, one has to navigate to Application Manager (App. Mgr.). This application is on 5700 XPressMusic phone in **Settings->Data mgr.** folder.

After opening the Application Manager, scroll down to the MIDlet in question. Press the middle key to see a menu and select "Open" to view and change the settings for each of the functional groups.
