NOKIA Developer

# Archived:How to make a basic key movement in Flash Lite

Archived: This article is **archived** because it is not considered relevant for third-party developers creating commercial solutions today. If you think this article is still relevant, let us know by adding the template {{ReviewForRemovalFromArchive|user=~~~~|*write your reason here*}}.

We do not recommend Flash Lite development on current Nokia devices, and all Flash Lite articles on this wiki have been archived. Flash Lite has been removed from all Nokia Asha and recent Series 40 devices and has limited support on Symbian. Specific information for Nokia Belle is available in Flash Lite on Nokia Browser for Symbian ⧉. Specific information for OLD Series 40 and Symbian devices is available in the Flash Lite Developers Library ⧉.

Flash Lite 1.1

Flash Cartesian Coordinate

First know that Flash Cartesian coordinate with four separate coordinate for each side. Basically Cartesian coordinate likes a flash root timeline. It will always start in the upper left hand corner on the root timeline. The top left corner in flash the X,Y coordinates is (0,0).

Flash coordinates represent position of WIDTH along the x axis and HEIGHT along the y axis

Flash coordinate represent positions of width along the X axis and Height along the Y axis.

Create a movie clip.

Draw 16X16 rectangle and make center align.

Make a Instance Name "**Player**".

Add key listener

```
on(KeyPress "<Left>"){
// Define _x axis movement.
/*The _x coordinate of a movie clip, relative to the local coordinates of the parent
movie clip. Its coordinate system refers to the upper-left corner of the stage as
(0,0).*/
//The width of the movie clip in pixels.
 if(player. _x>(player._width/2)){
 player. _x - =5;
     }
}

on(keyPress "<Down>"){
 if(player._x<(172-(player._width/2))){
   player._x +=5;
```

```
      }
}

on(keyPress "<Up>"){
// Define _y axis movement.
  if(player._y>(3+(player._width/2))){
   player._y -=5;
      }
}

on(keyPress "<Down>"){
  if(player._y<(203-(player._width/2))){
   player._y +=5;
      }
}
```
