

Archived:Installation of S60 3rd Edition ECMT Debug Agent fails (Known Issue)

Archived: This article is **archived** because it is not considered relevant for third-party developers creating commercial solutions today. If you think this article is still relevant, let us know by adding the template `{{ReviewForRemovalFromArchive|user=~~~~|write your reason here}}`.

Overview

Installing the S60 3rd Edition SDK's Debug Agent to S60 3rd Edition devices fails.

Description

The installation of the ECMT Bluetooth Debug Agent for S60 3rd Edition devices fails, resulting in the *Certificate error. Contact the application provider* prompt before the installation reaches its end.

How to reproduce

Try installing the Debug Agent available in the S60 3rd Edition SDK folder `S60tools\ecmt`.

Solution

EcmtAgent_MIDP_BT.SIS of the S60 3rd Edition FP1 SDK can be successfully installed to most S60 3rd Edition devices. In addition, Carbide.j includes a Debug Agent for S60 which can be successfully installed to some S60 3rd Edition devices.
