

Archived:Screen remains dimmed after flashBacklight() Java ME method called on S60 2nd Edition (Known Issue)

Archived: This article is **archived** because it is not considered relevant for third-party developers creating commercial solutions today. If you think this article is still relevant, let us know by adding the template `{{ReviewForRemovalFromArchive|user=~~~~|write your reason here}}`.

The article is believed to be still valid for the original topic scope.

Description

The method `flashBacklight()` does not work correctly. After the flashing effect the screen stays dimmed.

Solution

No solutions exist. The normal backlight can be adjusted from the screen brightness in the phone settings.
