MIDP 2.0 API access rights

As defined in the MIDP 2.0 specification.

Note that during the time when this version of the specification was drafted, certain optional APIs (like JSR-179) were not completed yet and hence the specification lacks information for that specific API.

Untrusted 3rd party domain

	No access	Ask always	Ask first time	Always allowed
Network access	yes	default	yes	-
Messaging	yes	default	-	-
