QtQuick Maps Examples

These examples are built QtSDK 1.1.3 and are using QtQuick 1.1 and Qt mobility 1.2. Some examples may not work due to the bugs. You may look into the bug report for the available fix. And in general the work for these examples are under processing.

Similar examples for Qt Maps (Non-QtQuick) can be found from Qt Maps Examples wiki article

Similar examples for Windows Phone, using Bing maps, can be found from the Maps Examples for Windows phone wiki article

HelloMap

This is a simple map without any additional code. It simply showing a map without interaction possibilities.

The example is available at QML helloMap.zip

Simple map

Hello world map example which has simple panning included in it.

The example available at QML SimpleMap.zip

Simple map 2

This is a simple map example added with kinetic panning. The kinetic panning is implemented with C++ Qt code.

The example is available at QML SimpleMap2.zip

Simple map 3

This is a simple map example with kinetic panning and pinch zooming. The kinetic panning is implemented with C++ Qt code.

The example is available at QML SimpleMap3.zip

MapInteraction

This example shows how to zoom the map, changing map type, moving to coordinates and getting current coordinate from the map.

The example is available at QML MapInteraction.zip

SimpleMapContent

This example shows adding & removing markers, polyline & polygon. Toggling visibility, using z-ordering and zooming to map objects

The example is available at QML SimpleMapContent.zip

MoreMapContent

This example shows how to handle circle, rectangle & text map objects with the map.

The example is available at QML MoreMapContent.zip

Map Markers

Simple example illustrating usage of clickable and draggable markers with QML maps API.

The example is available at QML MapMarker.zip
