Talk:HERE Maps API - How to display KML file data on the map

Eman.Refaat - XMLHttpRequest cannot load Map.kml. Cross origin requests are only supported for HTTP.

Hi There, I try to load map.kml file on map but, I get this error : (XMLHttpRequest cannot load Map.kml. Cross origin requests are only supported for HTTP.) I use the same code and same domain. any help

Thank you

Eman.Refaat 14:31, 31 January 2013 (EET)

Hamishwillee - Is the URL a local domain?

Hi Eman

As I understand it this happens when you do the request a local file rather than one hosted on a web server. Have you followed the instructions above and accessed via an http url?

If so and this still doesn't work I suggest you post on the Qt discussion board cross linking to here - that way you will get more eyes on the problem.

Regards

Hamish

Eman.Refaat - Useing Local domain

First of All Thank you Hamish very much. I solve the problem through the following steps:

- open project on visual studio. - open (Web.config) file and add handler for kml file as :

```
<staticContent>
    <mimeMap fileExtension=".kml" mimeType="application/vnd.google-earth.kml+xml" />
  </staticContent>
```

the all file :

<configuration>

```
<system.web>
  <compilation debug="true" targetFramework="4.5"/>
  <httpRuntime targetFramework="4.5"/>
</system.web>
<system.webServer>
  <staticContent>
    <mimeMap fileExtension=".kml" mimeType="application/vnd.google-earth.kml+xml" />
  </staticContent>
</system.webServer>
```

</configuration>

Thank you

Eman.Refaat 13:54, 3 February 2013 (EET)

Hamishwillee - That's great

Thanks for adding your solution!

Rochedy - Kml reading error

Hi

i have some probems with reading kml files with your javascript api.

When i read this file

```
<?xml version="1.0" encoding="UTF-8"?>
 <kml xmlns="http://www.opengis.net/kml/2.2">
  <Document>
   <Style id="gitesdegaule.fr">
   <LineStyle>
