

Category:HTML5

This category is for articles that demonstrate how to use HTML5-specific functionality (e.g. Canvas, offline storage etc) in the context of Nokia Services or on Nokia Platforms. Note that at time of writing neither [Series 40](#) or [Symbian](#) have an HTML compatible browser, so this will primarily contain topics about desktop browser use, or about Qt Webkit/HTML5 Hybrid apps on mobile devices

- [How to set WebBrowser control viewport dimensions on Windows Phone](#) .. leemcpherson
