

Category:MeeGo Harmattan

This category contains community-created topics about developing for [MeeGo Harmattan](#) and the Nokia N9 device. As the main app development framework for [MeeGo Harmattan](#) is Qt, most topics in [Category:Qt](#) are also relevant to MeeGo Harmattan Development.

Note:

- MeeGo is an open source Linux-based embedded platform managed by the Linux Foundation which combines Intel's Moblin and Nokia's Maemo. Nokia has created one commercial device (Nokia N9) based on MeeGo Harmattan.
- This category includes the **Archived Beta** [MeeGo Harmattan 1.2 Platform Guide](#). For the current platform guide see [Meego 1.2 Harmattan Developer Documentation](#).

We currently have 788 MeeGo articles in this Wiki.
