

Errors in code example of Nokia Qt SDK version 1.0

There are 2 errors in code example of Nokia Qt SDK version 1.0.

The 1st is in file C:\NokiaQtSDK\Examples\4.6\statemachine\eventtransitions\main.cpp

...

```
111 #if defined(Q_OS_SYMBIAN);
112 window.showMaximized();
113 #else
```

...

There is a ";" at the end of line 111, which can't be there.

The 2nd is in file C:\NokiaQtSDK\Examples\4.6\richtext\orderform\main.cpp

...

```
53 windows.show();
```

...

and it should be

```
window.show();
```

And these 2 errors are not corrected in version 1.1.
