Nokia 801T 27.005 firmware release:

This was the sales start SW for the device.

808 PureView

see all reported issues for this device: Nokia Developer bugs for Nokia 808 PureView

Change log of Nokia 808 PureView 113.010.1506/113.010.1507 (Nokia Belle FP2) SW release:

Camera improvements:

- Gallery Grid view when you have the phone in landscape
- Access to more functions when you open your images from the Gallery widget on your home screen – swipe through other images, zoom, share, edit, and send images faster.
- More information about your images, such as image resolution, ISO value, white balance setting, and file size, and the location. When you are connected online, one click will show you on Nokia Maps where the photo was taken.

- Select and delete multiple photos in Gallery Grid
- New reset button in Creative mode to change all the settings back to default with a single touch

Other improvements:

- Updated browser (version 8.3) with enhanced HTML5 support
- New and significantly faster keyboard
- Nokia Car Mode – easy access to your phone's key features when you're driving
- Performance and usability improvements

Nokia 808 PureView 112.020.0309 (Nokia Belle FP1) SW release:

This was the sales start SW for the device.

C6-01 ⧉

see all reported issues for this device: Nokia Developer bugs for C6-01 ⧉

Change log of Nokia C6-01 111.040.1511 (Nokia Belle Refresh) firmware release:

- Qt 4.8, Qt Mobility API 1.2, Qt Quick Components 1.1, Qt Webkit 4.8.1
- Bring web services to your home screen, and use them also offline with the new HTML5 browser
- Personalize your phone further with new widgets for various apps and services
- Get corrections, such as better support for Flash videos (.flv) and a time zone correction in Russia
- Link your contacts automatically to Facebook and Twitter for easier social networking
- A new version of Nokia Maps (version 3.09), with new features, such as photos on the map, info on interesting places nearby, multi-point routes, and public transport info
- Be more productive with Microsoft Apps
- Enjoy the refreshed Music player
- Number of general performance and usability improvements
- After updating to Nokia Belle Refresh, just like after updating from Nokia Anna to Nokia Belle, some apps may not work due to compatibility issues. For more info on available apps, please contact your local Nokia support.

Change log of Nokia C6-01 111.030.0609 (Nokia Belle) firmware release:

- Have up to six home screens with live widgets in different sizes
- Personalize your home screens with home screen widgets and shortcuts
- Get where you want to go quickly with the help of simpler menus
- See notifications and your connectivity options on any screen
- Customize your lock screen with wallpapers and important info
- Get improved apps for navigating, imaging, and browsing the web

Change log of Nokia C6-01 25.007 firmware release:

- Mail for Exchange issues solved
- New icons and wallpapers, and split screen view for Messaging, Mail, Browser, Phonebook, Calendar, and Maps
- Full QWERTY virtual keypad with split screen view and faster access to special characters
- New browser with new search features and most used features available with one tap
- New Maps with a public transport network view, and Check-in feature for sharing info about places
- Other performance and usability improvements

Change log of Nokia C6-01 24.001 firmware release:

- ???

Change log of Nokia C6-01 22.014 firmware release:

- New look and feel (Symbian Anna), performance and stability improvements
- Browser updated to version 7.3
- Qt updated to version 4.7.3, Qt Mobility 1.1.3
- Java Runtime updated to version 2.2

Change log of Nokia C6-01 14.002 (PR 1.2) firmware release (differences compared to previous 13.016 SW version):

- Improved Maps user experience, for example, with enhanced sharing possibilities and improved updating of new maps

- New version Nokia's Nokia Store is available
- General performance and usability improvements

Change log of Nokia C6-01 13.016 (PR 1.1) firmware release (differences compared to previous 11.012 SW version):

- Stability and performance improvements, numerous of tweaks and fixes
- Meeting requests can be accepted directly from email invitations
- Maps integration in email, which means people can view the meeting location on the map when the address is mentioned in the location field in the invite
