

# Mobile Design Pattern: Skype window

This design pattern is part of the Mobile Design Patterns series.

### Description

A theme which contains contact list with photo and personal profile of that person and sub window by which we can send sms or call that person urgently

### Advantage

• Better utilization of window. • Contact list with photograph. • Send sms or call in the near window. • Standard button inside personal profile.

## Disadvantage

• Used only for some application.

#### Use when

We can use this window when we need to call a person from a long list and we can send sms also in the sub menu if this main window.
