

## Ovi Upload photos in PHP5

This script is a wrapper around class.ovi.php that allows easy uploading of JPEG images from the command line to Share on Ovi. This code is based on Mac OS 10.4 but will give the basis for using on other O/S as PHP is available across several operating systems.

The code is by Peter Rukavina who has kindly given permission to use this script here and comes from his [website](#).

```
* UploadToOvi - A PHP script, to use class.ovi.php to upload photos from the command
line.
*
* This script is a wrapper around class.ovi.php that allows easy uploading of JPEG
images
* from the command line to Share on Ovi. Using Platypus
(http://sveinbjorn.org/platypus)
* under Mac OS X, you can use this script to create a droplet for uploading images.
For
* instructions on how to do this, see
http://wiki.ruk.ca/wiki/Creating_a_Share_on_Ovi_Droplet
*
* Requirements for use:
*
* - PHP 5 or greater
* - class.ovi.php (http://websvn.reinvented.net/wsvn/Plazes/Ovi/class.ovi.php)
* - class.wsse.php (available from http://www.dentedreality.com.au/phpatomapi/)
* - growlnotify (optional - see http://growl.info/documentation/growlnotify.php)
* - a Share on Ovi account
*
* Usage example:
*
* ./UploadToOvi.php myimage1.jpg myimage2.jpg
