Zoebali - Error while opening app

Hey Avnee,

Your app looks fantastic but while implementing it i am getting an error. The link attached here is the snapshot of the error when i click on "Select Button": <https://www.dropbox.com/s/qdj5dxqx5jsotr/Error.PNG> 📎

I am creating this app in Visual Studio 2012. Following link gives you the whole program created in Visual Studio 2012.

Avnee.nathani - I checked your code

Hi Zoebali

I checked your code. You have not initialized the objects so you are getting the NullReferenceException.

They should be initialized

```
PhotoChooserTask photoChooser = new PhotoChooserTask();  
BitmapImage image = new BitmapImage();  
PhotoResult photoResult = new PhotoResult();  
WriteableBitmap wb = new WriteableBitmap(512, 512);
```

I suggest that you try my example without modifications initially. You can download it from here:
