You have to create a MIDlet named ExampleMIDlet :
```

Here is an example :

```
import javax.microedition.midlet.MIDlet; import javax.microedition.midlet.MIDletStateChangeException; import  
javax.microedition.lcdui.List; import javax.microedition.lcdui.Display;
```

```
public class ExampleStreamingMIDlet extends MIDlet {  
    public List list;  
    public ExampleStreamingMIDlet() { list = new List("Accueil", List.IMPLICIT); }  
    protected void destroyApp(boolean arg0) throws MIDletStateChangeException {  
    }  
    protected void pauseApp() {  
    }  
    protected void startApp() throws MIDletStateChangeException { VideoCanvas VC = new VideoCanvas(this);  
    Display.getDisplay(this).setCurrent(VC); }  
}
```

RTSP link?

Is the RTSP link <rtsp://rtsp.youtube.com/youtube/videos/HtVbAazUekM/video.3gp> still working?

I get the exception:

```
javax.microedition.media.MediaException: Cannot create a Player for:  
rtsp://rtsp.youtube.com/youtube/videos/HtVbAazUekM/video.3gp at javax.microedition.media.Manager.createPlayer(+45)
```

Thanks,.

Viraj.mehta - Prefetch error -2

Hello,

After implementation of this code, I get the alert 'Prefetch error -2'. The url is the live stream of an IP camera and it is in mp4 format h.264 baseline profile. Any ideas why this may be happening ?

Thanks,
