Various S60 SDK Patches

This page will contain user contributed fixes for official and unofficial known issues with the S60 SDKs (e.g. code that generates compiler warnings, emulator startup optimizations, SDK cleanup scripts ...)

S60 2nd Edition

S60 2nd Edition FP1

S60 2nd Edition FP2

S60 2nd Edition FP3

S60 3rd Edition

S60 3rd Edition FP1

S60 3rd Edition FP2

S60 5th Edition

Using 5th Edition SDK v1.0 with Carbide vs 3.0.1 and VS 2005

To get the 5th edition SDK v1.0 to appear on the SDK Manager on Visual Studio 2005 you need to install 5th edition SDK v0.9 and rename these two files which can be found at C:\Program Files\Common Files\Symbian\SDK Descriptors\Nokia

- S60_5th_Edition_SDK_v0.9_v2.xml
- S60_5th_Edition_SDK_v0.9_v3.xml

Rename them to:

- S60_5th_Edition_SDK_v1.0_v2.xml
- S60_5th_Edition_SDK_v1.0_v3.xml

Then replace all "v0.9" substrings to "v1.0" and "v0_9" to "v1_0" inside the XMLs.
